Contribution in Development of EMS in India:

I received an opportunity to work with Symbiosis institute of Health Science to be a part of EMS education programs.

Received an opportunity to become AHA Life support Instructor and ITLS Instructor through Symbiosis Institute of Health sciences which helped me create a platform to become an efficient teaching faculty in EMS in India and abroad

Anything you would like to say to Dr. Rajhans :

Dr. Prasad Rajhans has played a pivotal role in setting up the EMS project in India. His brainchild really helping India to save a life of critically ill patients through EMS.

Dr. Rajhans also has been successful to create platform to develop EMS education in India through which several professionals received opportunity to serve themselves as an efficient EMS educators.
